# About Sonicco

---

Sonicco is a technology company based in the South East of the UK. Established in 2014. Sonicco designs, manufactures and distributes fire and security products throughout the world.

We have an experienced team of designers, mechanical and software engineers with the vision to deliver the most sophisticated fire and security products through unique and cutting edge technology.

Working with fire and security companies, Sonicco distributes globally through a network of trusted partners.

# Shuttle Fire Door Retainer

---

Shuttle is a WIRE-FREE fire door retainer. Shuttle is designed to legally hold open fire doors. When the fire alarm sounds, Shuttle will react, allowing the fire door to close safely.

- Intelligent listening: Learns voice, intermittent and continuous fire alarms
- Upto 24 months battery life
- LCD screen for easy set up
- Night time release facility
- Slimline design
- Fault indicator
- 5 Year warranty
- BS 7273-4: Category C
- CE Marked

# Shuttle Lockdown

---

Lockdown alarms are being introduced throughout Schools in the UK. Different from the fire alarm they are designed to keep people in a building. For example, in a terror attack the school will go into 'Lockdown'. Students will be contained in safe areas of the School.

Lockdown procedures can also be known as 'sheltering in place'.

We designed Shuttle LD to listen and learn upto 3 different alarms. You can teach Shuttle LD the fire alarm and the Lockdown alarm.
